

◉ Kadamba

A Vedic astrology reference — 9 planets (grahas), 12 signs (rāśis), 12 houses (bhāvas), with their characteristics and significations. Free · no login · works offline.

OPEN THE APP

<https://skipit.github.io/kadamba/>

Point your phone camera at the QR code, or type the link into any browser. No app store, no download, no account needed.

On a laptop or desktop browser

1. Open **<https://skipit.github.io/kadamba/>** in Chrome, Edge, Firefox or Safari.
2. Use the top tabs — **Planets · Signs · Houses · Concepts** — and tap any card to open its full page.
3. **Search:** click the search box (or press ) and type anything — a name like “Mars”, or a theme like “marriage”, “career”, “mother”. Press  to clear.
4. Follow the **gold links** inside any page to jump between related planets, signs and houses (e.g. Aries → its ruler Mars → the houses Mars signifies).

On an Android phone — install the app

1. Open the link in **Chrome**.
2. Tap the **Install app** button in the gold header. (If you don't see it: tap the **:** menu → **Install app** or **Add to Home screen**.)
3. Confirm — the Kadamba icon appears in your app drawer, like any other app.

Installed app: opens full-screen (no browser bars) and **works fully offline** — read it on a flight or with no signal.

On an iPhone — add to Home Screen

1. Open the link in **Safari** (use Safari, not Chrome, for this).
2. Tap the **Share** button — the square with an arrow pointing up, at the bottom of the screen.
3. Scroll down and tap **Add to Home Screen**, then tap **Add**.
4. The Kadamba icon appears on your Home Screen — tap it to open full-screen, offline-ready.

Note: the “Install app” button does not appear on iPhones — installation is always done through Safari's **Share** → **Add to Home Screen** menu.

Good to know: Kadamba is a website, not a Play Store / App Store download. It's free, has no ads, collects no data, needs no login — and updates itself automatically whenever new content is added.
